

VR Controlling

Pan An

National University of Singapore

October 8, 2016

System Brief

Perception

- Visual
- Touching

Controlling

- Spatial
- Perceptions

System Brief

Interaction and Feedback

System

System

Kinematics

Gesture Encoding

(a) Flick

(b) Push

(c) Pull

(d) Double Flick

(e) Punch

(f) Lever

(g) Zoom In

(h) Zoom Out

Gesture Encoding

Gestures are limited?

- Gesture Encoding
- Gesture Combinations
- Automated Adjustment through Reinforcement Learning

A Step Forward

Problems

- Precision might not make it easy to use
- Data latency
- Collisions
- Behavioral actions(human)

A Step Forward

- Machine Learning
- More peripherals
- Gesture recognition methods(Appearance-based models)
